

Maurizio Scibilia

AI Engineer | Retrieval, Evaluation & AI Orchestration

Italy (Remote) | [LinkedIn](#) | [Website](#) | [GitHub](#) | [Mail](#) | +39 392 182 6406

SUMMARY

AI Engineer focused on retrieval, evidence grounding, AI evaluation, and orchestration. I design and build systems whose behaviour can be inspected, benchmarked, and improved through failure analysis. My recent work spans ParancU, a local-first evidence retrieval system available on the Apple App Store, and ParancU Agent Lab, which integrates retrieval into a grounded AI workflow.

SELECTED AI WORK

ParancU v1.1 | Local-first Evidence Retrieval | iOS | [Available on the App Store](#)

- Took the project through research framing, architecture, implementation, benchmark design, failure analysis, mobile integration, and App Store release.
- Built it as an inspectable AI system with documented architecture, evaluation results, and a white paper describing both results and limitations.
- Tech: Python, TypeScript, React Native, ONNX Runtime, multilingual E5 embeddings, local retrieval, iOS deployment.

ParancU Agent Lab | Grounded AI Workflow | GitHub | [Try it!](#)

- Extended ParancU into a grounded AI workflow that retrieves and fuses evidence across multiple chunks, generates evidence-constrained answers, verifies completeness, and retrieves again when information is missing.
- Built and deployed a browser-first web application with local prepared-corpus retrieval, evidence inspection, optional server-assisted generation/verification, and deterministic tests.

PROFESSIONAL BACKGROUND

Long-standing experience across software engineering, consulting, web, data science, and AI, including work with Siemens, framfab, Deep Consulting, Spindox, and other organisations.

EDUCATION, CERTIFICATIONS & LANGUAGES

MSc in Computer Science, University of Pisa – **A** (highest honours)

18-month research thesis on LRAM graph neural networks, including original theorems on asymptotic and exponential stability.

Master in ICT, Cefriel / Politecnico di Milano – **A** – Scholarship recipient.

MBA, LUISS Guido Carli – **A** – Scholarship recipient, international exchange at Paris Dauphine University.

TensorFlow Developer Certificate (2021-2024)

Google Cloud Professional Machine Learning Engineer (2023-2025)

Languages: Italian native, English fluent
